HE subscriber having taken the agency for the sale of Burdlet and Bartlett's Greeinn tanulchong Oil Polish, is now prenipared to furnish the article to store keepera at Manufacturer's prices.

This article is composed of neats foot oil and Gulta Percha, acting as a preserver of leather as well as polish. An article of this kind has long been needed, as a very one knows that common blacking will not polish or oil over grease.

The attention of livery stable keepers, and those keeping corriages and harnesses, is in vite to this article, as it is unsurpassed for the purpose of cleaning carriage tops, harneses, &c. It is put up in large size boxes, convenient for the act of livery stable keepers, and was made as a first the best blacking in the market.

AMERICAN AND FORRIGN PATENTS

(A. H. EDDY. Solicitor of PATENTS)

(Late Agent of U.S. Patent Office, Washington, under the Act of 1837).

(A. 76 TTATE, opposite allay at.

(A. of twenty years, continues to secure Patents in the Udited States; also in Great Britain, France and other foreign countries.—

Caverts, Spécifications, Bonds, Assignments and all Papers or Drawings for Patents, executed on liberatierms, and with despatch. Researches made into American or Foreign works, to determine the whichty or utility of Patents or inventions,—and legal or other advice free dered in all masters touching the same. Opics of the claims of any Patent furnished by remitting One Collar. Assignments recorded at Washington.

This Agency is not only the largest in New England, but through it inventors have advantages for securing patents, or ascertaining the patentability of inventions, unsurpassed by if not immeastiably superior to any which can be offered them elsewhere. The testimonials below give proof that mone is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS 18

THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant-reason to believe, and can prove that at no other office of the kind are the charges for professional services so moderate. The humense practice of the subscriber during twenty years past has enabled him to accumulate a sast collection of specifications and official decisions relative to patents. These besides his extensive library or legal and mechanical works, and full accounts of patents granted in the United States and Europe; render him able, beyond question, to other supero facilities flur obtaining patents.

All necessity of a journey to Washington to procure a patent, and the usual great delay there are here saved inventors.

From the Home Journal. UNDER THE SNOW. The sky looks pale through a misty voil; The winter wind wails lond; And cloud-shapes grieve, as they rapidly warr. The cold still earth a shroud.

Come trooping down the sky—
Like shapes of a dream, or like angels they seem.
At they fleat so sirily by:

But now since we know, that under the suow, Hid from the light of day, there are treasures fair--treasures most rare In darknows hidden away;

Our gladness is o'er, and we love no more To see the snow fall come; For a heavy chill, and a sense of ill, It brings to our heart and home.

Something more bright to our yearning sight, Samething for deaver than they Is lying low, under the enow On this bleak, and winter day.

If we think with dread of the blossoms dead, Under this covering chill, What a deeper wee must our sad hearts know For that something dearer still!

Coverdale's Courtship.

The next was an eventful morning-a marked day. If we were only painting for effect without regard to truth, we should make it a gloomy, lowering morning, the black clouds filing up the sky as though frowning at the sm below. A real novelist has such a love for "keeping" and "litness" that the templation would be irresistable. But we are not novelists—we are doing as we said before, a but of history, and we have suitt before, a bit of nietory, backed by the prediction in Francis Moore's Almanae for that year, which we have subsuited, that that particular ôth of November, was as bright a day as the boys who in-dulged in Guys and bonfires could de ier. A little frosty—the ground crisp—the window panes in the chambers crusted over with those arabesques which our old Nurse used to tell us "Jack Frost" made-the sky is blue as midsummer, and the sun as bright, if not as warm as June, of the latest patterns and most fashionab designs. Large Fires and Steam Engine-Sinking of a Steam Ship-Reception of Sena-tor Seward-New Democratic Hall-Cooper Institute-Skating-Billiards-Nein Year, &c.

New York, Jan. 6th, 1860

Our brave firemen have this month had their hands full. Besides any number of small fites on which their services have almost nightly been bestowed, no less than three extensive conflagrations, each destraying property to the amount of over one hundred thousand dollars, have taken place within a month. The last which occurred

city, the scene of ruin extending from Beekman, through Ann to Fulton street. The loss will be not far from a million of dollass. Among the sufferers is Cyrus W. Field of Atlantic Cable celebrity, who loses from ninety to one hundred thousand dollars. The virulence of the fire was in a measure owing to the intense cold, the mercury being seven or eight degrees below zero, hydrants frozen, and firemen hardly able to move for the ice in which they were almost solidly incased. As it occasion they kept up a continuous stream, did first rate service, didn't get cold, didn't " stop to drink," and, in a word, completely removed the prejudice which has existed among old firemen ever since their innovatien.

The steamship Grenada, in coming into our harbor, after a prosperous voyage to Havana, on Wednesday evening ran into a field of floating ice, and stove a hole in her bows. She was barely able to reach her dock, where she discharged her frighta total loss.

Speaking of exercise, I have observed that the game of billiards is becoming more and more fashionable, very many of the homes of our citizens, among whom I might enumerate several elergymen, now contain a billiard table and more or less of good players among the ladies as well as the gentlemen of the family. In a word, billiard playing has become domesticated as a fireside amusement. Much of the popularity of the game is due to the wellknown player, Mr. Phelan, who in devoting to it, time, fortune and experience, has s..cceeded in dispelling the prejudices which used to exist as to its immorality, invested it with a dignity like that of the game of chess, and familiarized it among the intelligent and cultivated of all classes. Pheof this popularity, and is devoting himself to the perfection of the apparatus of the game, his improvements upon which, are alterdy in general use. He has also written a work entitled "A Manual of Bilfiorde," which is a comprehensive treatise upon the subject. So great has been the revolution in the game since the introduction of Phelan's tables, that the manufacturers under his patents have been compelled to move into an establishment covering nearly a block, in order to have facilitics for meeting the demands made upon them.

Phelan himself, has announced his intention to engage in no more contests, unless it be with foreign champions who may desire to measure laces with him, petus, will not be drawn the a game with a competitor who seeks hotoriety merely, at his expense. Roberts, the English player whom he challenged, has backed out; and there is now some talk of a match with Berger, a noted French player.

Prince Jeroma Bonaparte, ex-King of Westphalia, and the last surviving brother of the first Napoleon, is dangerously ill; and he may possibly, not recover, having test from this, and other circumstances known been in poor health for the last two years. A few nights ago he was in the Imperial loge at the Opera, and was amongst the most enthusiastic admirers of Pauline Viardot, the great singer. Inspired by the illustrious part of her audience, Mme. Viardot did wonders that night, and found again the notes of her brilliant days. She electrified the house, and was presented the next day with a pair or magnificent cameon by the liberal Prince Jerome.

The ex-King of Westphalia was born in 1784, and is consequently 76 years of age. His life, line that of his brothers, has been very agitated, but more fortunate than any of them, he has lived long enough to witness the re-gilding of the family escutchcon. King Jerome, unlike his son, was not deficient in courage, and at the hattle of Waterloo, he nobly paid his debt, to his

A great sensation has been produced by pumphlet of Emiliandes Girardin, Called Napoleon et l'Europe." This pamphlet had been originally seized, but was finally permitted to appear; and for these reasons was read with avidity. It contains the same favorite ideas of M. Girardin, dressed and shaped in a different style. When we think of all the public men, ministers, ora tors, writers and even dictators who have defiled before our eyes since 1848, and who are to-day politically dead and buried, we candot but admire M. de Girardin, who has sirceeded in keeping the public in mind of him, and has from time to the con e forward with some stirring and boldpublication. Aladenize, French Consul at Nice, who, being Lieutenant of Infantry, embraced the cause of Prince Louis Napuleon, has just received from his Imperial master, an estate worth 300,000 francs. The Emperor had already heaped layors on M. Aladenize and his family.

You have undoubtedly heard of the four merchants of Liverpool, who have taken it ucon themselves to write to the Empero of the French, to ask him his in entions with regard to England. Their letter cre ated much merriment in the public, but Napoleon III. had the condescension to answer them, saying in substance, that great nations should appreciate and not fear each other.

The Medical Faculty of Paris are now earneatly engaged in experimenting upon a new method of anesthesia which promises to a certain extent to do away with the use of Chloroform in surgical operations. This system unites the scientific with the amusing, and as it gratifies curiosity and the love of the marvellous, it promises to become as popular as the turning table did. The new method of producing sleep and insensibility consists in placing a small, brilliant object before the eyes of the person upon whom the experiment is to be made, few inches before the root of the nose and so that the patient cannot regard it without squinting. The eyes being fixed ujon this object, the pupils immediately commence contracting, but seen afterwards dilate and in from one to five minutes a state of catalepsy is produced, so that the limbs of the patient, being raised or bent n any position, remain fixed as they are placed. There was no Insurance on the property destroyed. The bell at the Asylum was rung. as on as the fire was discovered, but being early in the morning, and Sunday too, when people generally sleep later, it was not heard in the city; neither were the fames seen, as the for was very thick. It is fortunate that the fiences did not communicate with the main building, for if they had, the consequences must have been terrible, as there are shoul 60 immates, 21 of whom are insune; others are very old, blind and helpless, and many of them would undoubtedly have been destroyed. One can hardly conceive of the depravity of a mend who would be guifty of such a diabetical act. It must have been the malicious work of one of the inmates, because, of course, no one would have gone to the Island for such a purpose, and none of the inmates had occasion to go to the building that was destroyed, particularly at that hour of the morning, except for incen diary purposes. Nothing is more terrible ther a fire at a Poorhouse, where aged, insune, foolish and crippled persons are confined; we are glad to learn that the Mayor is energetically engaged in the matter, and that he is deter-mined it possible, to cause the guilty person to be published, to the utmost extent of the IF Prof. Grimes will lecture this evening

temporal extensishing curative properties; if acknowledged to be infinitely superior to all other preparations for the curvof Polanonary Direase, both from its innocent nature and its most astonishing curative properties; if being the only remedy known that will arrest the development of Tubercles in the Lungs, or restore the rate functions of the pulmonary organs to their normal candition. Its invaluable properties have obtained for it the highest recommendations and praise from some of the most eminent physicians and chemists in the country; while the best and surest proofs of its merits are afforded by the numerous testimonials of its great efficacy in conquering disease, which are constantly received from our most respectable chizens. Invalida in all stages of pulmonary disease should not fail to give it a trial, as i. can be administered to the most delicate and fe-tile with perfect safety and certain relief; and we herewith insert a few testimonials for their encouragement, selected from hundreds of like import. Certificate of Dr. A. A. HAYES, in reference to the unequalited virtues of this great discovery. This preparation, by chemical analysis, was proved to be free from opinum rany of its compounds; nor were any of the alkabidiz present. It dues not contain any mercarial of mineral substance, but consists wholly of volatile, diffusible agents, which afford vapous freely at a moderate temperature. Most of the substances present are efficiently used in alleviating pulmonary disease; but the device by which they are combined is now and original, and adapts the compound to inhabition, or other modes of administration.

A WORD TO INVALIDS.

A WORD TO INVALIDS.

All who have any serious or troublesome disease will very naturally seek adrice somewhere, and this leads me to says few words on the choice of a physician. And first, et all geacks, impostors and humbugs alone. If you have an intelligent physicien in your vicinity apply to him immediately, and follow his directions explicitly, and for a sufficient length of time, and he will probably cure you; if not, then apply to one who makes your disease a specially, for no physician in general practice, no matter how eminent, can treat a given, disease, or class of diseases, at successfully sas one of the same ability who makes such diseases, a specially, and devotes his whole attention to them. Educated physicions hitherto have stood aloof from making private diseases a country, and hence they have been monopolized by quacks.—
The fear of losing caste in society, or of being class d among charlatans by the profession, has soo long stood in the way of this most desirable result. Mhat disgrace is there in treating a class it diseases specially that all physicians trear regeneral piractle. Hierardof Paris, and acton of London, both ask Private Diseases a specially, and yet their fameia an envisble as it is world-wide. It is in fact the only resouly fur one of the most heimous and destructive systems of quackery in private diseases as precised in all the larger cities throughout the country.—But to return I said let quacks, and impostors alone. Their adverti ements fill the newspapers and are well calculated to decrive the inexperienced, made up as thay re of the most extravagant precessions, har without a shadow of evidence of the truth of what they say. Advertising in itself is no sin, but decognize advertisements are an abomination, and a careastisting in itself is no sin, but decognize advertisements are an abomination; is mittled to

both of his honesty sud his skall. In offering my services in a speciality which has heretofore been almost exclusively in the hands of impostors, I ask no man to employ me who is not fully convinced that I shall treat him courteously, deal honorably and with the atrictest fidelity, and give him the beat possible chance for a speedy and permanent cure. Which shelds glowingly of the superior more act to have when coming from a reliable source. If see tileates one guarantees of truth, the Dr. needs no encondume ror weders published from the press:

BATH, Maine, Jan. 29, 14 to. Prof. O. J. Wood & Co.;

Prof. O. J. Wood & Co.;

Gentlenen: Having my attention called a few months since to the highly beneficial effects of your hair restorative, I was induced to make application of it upon my own hair, which had become quite grey, probably one-third white; my whiskers were of some-character. Some three mouths since I procured a hottle of your hair restorative, and used it. I soon found it was proving what I had wisbed. I used it about a week. They since procured another bottle, of which I have used some. I can now certify to the world that the gray or white hair has totally disappeared, both on my head and face, and my hair has resum dits natural color, and I believe, more soft and glossy than it has been before for twenty-five years. I am now sixty years old; my good wife at the 'ge of fifty-two has used it with the same effect.

The above notice I deen, due to you fur your valuable discovery. I am assured that whoever will rightly use, as per directions, will not have occasion to contradict my statements. I am a citizen of this city and a resident here for the lost of fiften, verus, and am

WOOD'S HATR RESTORATIVE.
Professor Wood—Dear Sir: Having had
the misfortnne to lose the best portion of my
hair, from the effects of the yellow fever, in
New Orleans in 1861, I was induced to make
a trial of your preparation, ann found it to
answer to the very thing needed. My hair is
now thick and glossy, and no words can express my obligations to you in giving to the
afflicted such a treasure.

DR. DUCONCA'S Golden Periodical Pills for Females. Perfectly harmless, yet wonderfully and no werfully efficacious in correcting regulating, and removing all obstruction from whatever sause.

All medical men know, as well as anny others that no female can enjoy good health, unless sine is regular; and whenever an obstruction takes place, whether from exhosure, cold, or any other cause, the general health begins immediately to delified; and the want of such a remedy has been the cause of so hany consumptions among young females. Headniche, Paint the Side, Palpitation of the Heart, Leathing of Food, and Disturbed Sleep, do most always arise from the interruption of nature; and whenever that is the case, the Pills will invariably remedy all these evils; and may always be used successfully as a proventive.—Price SI per tox. For sale at 132 Thames street, borner Churchstreet, and at 12 Washington Square, opiosite State House. Orders for the trade so addressed will be supplied at lowest manufacturer's prices. Ladies by enclosing file STURRORS (20), How son! Newport Pust Office, can have the Pills rent condidentially) by mail to any part of the city or ountry.

CAUTION.

Persons living at a distance should be extremely cautious of whom they order Loftery Tickets or Certificates of Packages of Tickets The country is flooded with bogus and swindling Lotteries. Every inducement is held out to get persons to invest money in them—tapital Prizes of from \$20,000 to \$40,000 head their schemes—with Tickets at One Dollar.—\$100,000 Capital Prizes are offered, Tickets \$35. All such, in every instance, are frauds and if money is sent to them for Tickets, it is so much thrown away without the shadow of a chance of getting a prize. Beware of aid Lotteries where the tapital Prize is unusually large in comparison to the price of Tickets. In every instance where large Prizes are offered for a small cost of Tickets, put it down for a certain traud.
